* Claims 1-11:

The subject matters of claims 1-11 do not appear to involve an inventive step in view of documents 1-7 cited in the ISR.

Document 1 describes that 3-hydroxybutyric acid and/or its salt have a good therapeutic effect on corneal epithelial damage. Since document1 does not describe an effect for lacrimal disorders, however, the subject matters of claims 1-11 of the present application differ from that described in document1.

As described in the documents 2-7, however, a person skilled in the art knows well that corneal epithelium closely involves stabilization and retention of lacrimal layer, a person skilled in the art could have easily conceived the idea of using 3-hydroxybutyric acid and/or its salt for treating lacrimal disorders.
